DENY KURNIAWAN

React Developer | DevOps-Minded Software Engineer

Yogyakarta, Indonesia | 0812deny@gmail.com | +62 852-9081-5170 linkedin.com/in/dekakrens | github.com/dekakrens

PROFESSIONAL SUMMARY

Frontend-focused Software Engineer with 4+ years of experience building and shipping production web and mobile applications using React, React Native, and modern JavaScript/TypeScript. Combines strong feature development skills with hands-on exposure to Docker, CI/CD pipelines, and production monitoring, having supported deployments and troubleshooting for live applications. Experienced in collaborating with cross-functional teams and international clients across time zones, communicating clearly in written English through documentation, pull requests, and technical discussions, with a track record of delivering secure, user-friendly, and reliable software.

TECHNICAL SKILLS

Frontend: React.js, Next.js, TypeScript, JavaScript, TailwindCSS, Redux, TanStack Query
Mobile: React Native, Flutter
Backend: Node.js, NestJS, Express
Database: PostgreSQL
DevOps & Operations: Docker, CI/CD (GitLab CI), Production Deployment, Application Monitoring & Error Tracking (Sentry)
Languages: JavaScript, TypeScript, C++, Dart

PROFESSIONAL EXPERIENCE

Front End & Mobile Application Developer *Oct 2021 - Present*

Meetaza Prawira Media, Yogyakarta

- Developed and maintained responsive web applications, ensuring consistent updates and stable performance in production.
- Built a cross-platform Android application using React Native and Flutter, cutting company development costs by 50%.
- Designed and shipped an AI-powered chat feature within a web application, focused on a clean, user-friendly experience.
- Developed a GPS tracker web dashboard using Leaflet and a video-conferencing application using Agora.
- Implemented and consumed RESTful APIs and WebSocket communications to power real-time features.
- Contributed to deployment and release workflows using Docker containers and CI/CD pipelines (GitHub Actions/GitLab CI) to support consistent staging-to-production releases.
- Assisted with monitoring application health and troubleshooting production issues, using Sentry for error tracking to speed up incident resolution.
- Translated Figma designs into polished, responsive web and mobile interfaces.
- Collaborated closely with cross-functional teams and an international client to deliver web and mobile applications on schedule.

Key Achievements:

- Delivered 4+ production web applications, directly contributing to company revenue growth.
- Shipped 1 Android and 1 iOS application from development through release.

Mobile Application Developer *Jul 2021 - Sep 2021*

Goritma Tech, Freelance

- Developed an Android application for tracking menstrual and pregnancy health.
- Implemented state management and integrated RESTful APIs.
- Collaborated with a backend developer to integrate application data and services.

Key Achievements:

- Successfully delivered a health-focused mobile application to the Play Store within 3 months.

PROJECTS

Digital Talent Incubator — Android Developer *Sep 2020 - Dec 2020*

- Developed an Android application using the React Native framework.
- Integrated Firebase Authentication and Firestore for backend services.
- Gained foundational, hands-on experience with CI/CD pipelines for continuous delivery.

EDUCATION

Bachelor of Telecommunication Engineering (Electrical Engineering) *Apr 2021*

Telkom University

Catena: Abnormal Heart Rate Monitoring With Real-Time Notification

Bachelor Thesis · Sep 2020 - Dec 2020

- Researched and analyzed arrhythmia detection using IoT devices and smartphones.
- Designed Printed Circuit Boards (PCBs) for IoT devices and analyzed BLE connectivity and device reliability.
- Built an Android companion application using React Native.

ORGANIZATION

Multimedia Application, Big Data, and Cyber Security *Feb 2020 - Feb 2021*

Telkom University
